

Smart vs. Wise

Smart can define for you - all of the ways
A pan on a stove can get hot
Electrical Coils - Magnetic Induction
Gas BTU's and "Whatnot"

Smart can provide the means to produce
A stove that will meet any budget
But as "Smart" is able to make a pan hot
"Wise" simply knows not to touch it

Smart can create a presence online
Where millions of minions will follow
Committing their lives - their treasure - their time
Convinced it will all end tomorrow

Wise to the contrary measures' response
It does not commit on a whim
Wise weighs the outcome of logic and fact
Before its emotions set in

If Smart is the Engine propelling mankind
Inventing for Invention's Sake
I Pray as we speed well beyond our control
That Wisdom will act as a Brake
